Mouse

RButton + Drag

Most powerful feature of NiftyWindows. The area of every window is tiled in a virtual 9-cell grid with three columns and rows. The center cell is the largest one and you can grab and move a window around by clicking and holding it with the right mouse button. The other eight corner cells are used to resize a resizable window in the same manner. Alt + RButton + Drag – This modifier locks the width and height ratio Win + RButton + Drag - This modifier lets you resize all four edges of a window in a symmetrical manner around the window center.

Alt + wheel

Resize active window in 10% steps

Win + Alt + wheel
